### Clinical Systems achieves ISO9001 Quality Standard

Clinical Systems Ltd, the leading European supplier of laboratory information management systems developed specifically for the research clinical pathology laboratory, is pleased to announce that it has achieved certification under the ISO9001 quality management standard.

“We regularly work with some of the world’s leading pharmaceutical companies and contract research organisations that use the laboratory information systems we have designed and optimised to meet the exacting needs of the clinical research process. We have worked towards registering for the ISO9001 standard because we believe it will demonstrate to our customers that Clinical Systems offer a quality product which meets the standards of Good Laboratory Practices and give them confidence they are dealing with a quality managed organisation. We are very proud of this achievement,” said Graham Wilson, Managing Director of Clinical Systems Ltd.

#### About Clinical Systems Ltd:

Clinical Systems Ltd. was founded in 1988 to develop and market computerised Laboratory Information Systems designed specifically for the clinical pathology laboratory supporting pre-clinical and clinical research and product development. The ClinAxyS<sup>®</sup> system has, over more than fifteen years, been developed into a world-leading and most-comprehensive laboratory management system and is used widely by pharmaceutical, chemical, and contract research organisations throughout the world as the backbone of their analytical laboratory management. Clinical Systems delivers a one-stop solution for all aspects of Clinical Pathology laboratory data management, from planning and design through to installation, training, validation, and ongoing technical support.
