Clinical Systems becomes Oracle® Partner

Clinical Systems Ltd, Europe's leading supplier of ClinAxys® II, the Laboratory Information Management Systems (LIMS) designed specifically for the clinical pathology laboratory engaged in product development and clinical trials, has become an Oracle® Partner.

Following the launch of the universal interface between ClinAxys® II and Oracle® relational databases, Clinical Systems has decided to become an Oracle® Partner. Membership will enable Clinical Systems to:

- maximise the level of Oracle® support we are able to provide,
- supply Oracle® products alongside its own,
- provide additional Oracle®-based services such as web reporting from the Oracle database,
- develop expertise in relevant Oracle® applications.

This development is part of Clinical Systems policy of always looking to increase and improve the products and services which it supplies to its customers in the research-based clinical pathology laboratory.

Clinical Systems will use existing expertise with extensive Oracle® knowledge within the Group to provide these services.

This development recognises the increasing role that Oracle®-based solutions and services are playing in the drive to increase research efficiency, maximise data integrity and reduce data handling costs within all research-based organisations who are required to handle increasing volumes of data.

Note to Editors:

Clinical Systems Ltd was founded in 1988 to develop and market computerised Laboratory Information Management Systems designed specifically for the clinical pathology laboratory supporting pre-clinical and clinical research and product development. The ClinAxys® II system has, over more than fifteen years, been developed into a leading and most comprehensive laboratory management system and is used widely by pharmaceutical, chemical and contract research organisations throughout the world as the backbone of their analytical laboratory management.

ClinAxys® is a registered trade mark of Clinical Systems Ltd.

Oracle® is a registered trade mark of Oracle Corporation.

ENDS.
